

July 2011 Daytimer pages

This free PDF file contains daytimer pages for 8.5 X 11 inch daytimers and pages for 5.5 X 8.5 inch daytimers. Please follow these instructions to print out the pages you require.

8.5 X 11 inch

These pages are full size. First print out page 2, preferably in color. Then place page 2 back in your printer in the appropriate manner to print the second side, page 3. Each printer is different, so it might take you more than one try to get the pages right, back to back, to form a single daytimer page. Be aware that although every effort has been made to line the pages up correctly, there might be some slight over hang as every printer has different internal margins that I cannot compensate for. Some printers have special settings for two sided printing. The gray punch holes on page 2 are approximate. Again, because of printer variations, positions might differ. It is best to compare the newly printed daytimer page with one of your regular daytimer pages. Punch the holes and place the page in your daytimer.

5.5 X 8.5 inch

These pages will need to be cut down after they are printed. First print out page 4, preferably in color. Then place page 4 back in your printer in the appropriate manner to print the second side, page 5. Each printer is different, so it might take you more than one try to get the pages right, back to back, to form a single daytimer page. Be aware that although every effort has been made to line the pages up correctly, there might be some slight over hang as every printer has different internal margins that I cannot compensate for. Some printers have special settings for two sided printing. Once the pages are printed on the same piece of paper, cut the pages down to size following the faint dotted lines on page 4. Use a paper cutter for the best results. The gray punch holes on page 4 are approximate. Again, because of printer variations, positions might differ. It is best to compare the newly printed daytimer page with one of your regular daytimer pages. Punch the holes and place the page in your daytimer.

July 18-19th

BEST OF THE MONTH

It is interesting that the better Moon signs are in the water signs this month. The sign of Pisces is not known for its strength. Acting under this sign does not make you a force of nature that needs to be reckoned with. It is the best Moon sign of the month and shows that justice and morality can triumph. The Moon will make a sextile to Pluto and Jupiter early on indicating dramatic and beneficial changes. Since Jupiter is the co-ruler of Pisces, you can be heard. Others will pay attention to the spirit of the law more than the letter of the law. The Pisces Moon will square Mars in Gemini after the Moon sextiles Jupiter. It will be interesting to watch what will happen in both the Caycee Anthony case and the Amanda Knox trial if they settle on these days. A backlash is possible in regard to the lawyers' behavior in court and judicial interpretation of the laws. Changes in decorum and due process are likely as the Moon will parallel Uranus before trining the Sun.

What does this mean for you and how does it apply? First, the squeaky wheel gets the oil, if and only if, you have rights and are morally correct. The theme for this day might be, "Walk softly and carry a big stick, (or a loud voice!)" The Moon's first aspect is a conjunction to Neptune, the co-ruler of Pisces. There is likely to be some confusion, uncertainty, or misrepresentation that will need to be cleared up. Then the Moon will sextile Jupiter, the other co-ruler of Pisces. Jupiter also rules Sagittarius and legal proceedings. You have to be on the right side of the law to succeed. Finally, the Moon will trine the Sun in Cancer as the final aspect. You do have rights and if you focus on them, you can be successful.

Plans for July 18th _____

Plans for July 19th _____

Uranus Retrograde - Uranus turns retrograde on July 10, 2011 at 4 Aries 34 and remains retrograde until December 10, 2011 when it turns direct at 0 Aries 39.

Neptune Retrograde - Neptune turned retrograde on June 3, 2011 at 0 Pisces 56 and remains retrograde until November 9, 2011 when it turns direct at 28 Aquarius 08.

Pluto Retrograde - Pluto turned retrograde on April 9, 2011 at 7 Capricorn 30. It remains retrograde until September 16, 2011 when it turns direct at 4 Capricorn 54.
